

TEMPEST AERO™
GROUP

Pneumatic, Filtration and Ignition Products

Pneumatic filtration and ignition products from Tempest® lead the general aviation industry through a reputation of innovation, value, and superior quality. Aero Accessories™, our affiliate, manufactures Tempest products including a complete line of OEM dry air pumps, pneumatic valves, regulators, oil filters and spark plugs, as well as diaphragm fuel pumps and specialty tools. Tempest is the OEM product of choice for engine and airframe companies throughout the world.

Probes and Sensors

Alcor® develops exhaust gas, cylinder head and turbine inlet temperature sensors, analog instrumentation, test equipment and accessories. Sensors and probes from Alcor are suitable for both analog systems and the state-of-the-art glass panel systems of today. The Alcor Supplemental Type Certificate allows for the installation of Alcor probes in any reciprocating engine and is recommended by OEMs of digital engine monitors, airframes and aircraft engines.

Stratus Tool Technologies™ manufactures the Tempest® brand of oil filter adapters for Continental® 4- and 6-cylinder engines. These oil filter adapters are designed to convert legacy oil screen systems to a spin-on oil filter system using a Tempest oil filter. Stratus Tool Technologies also designs and manufactures a line of Tempest brand specialty aircraft maintenance tools.

Oil Filter Adapters and Specialty Tools

Aircraft Carburetors and Components

Marvel-Schebler® Aircraft Carburetors is the exclusive manufacturer of genuine Marvel-Schebler OEM and FAA-PMA carburetors and parts. Marvel-Schebler uses a proprietary, state-of-the-art digital flow bench to evaluate and to calibrate factory new, rebuilt and overhauled carburetors. All overhauled carburetors are done so in accordance with the FAA's certified repair station designation awarded to Marvel-Schebler.

Fuel Injection Systems and Components

Precision Airmotive® is globally respected by engine manufacturers for excellence in engineering and expertise as the OEM of RSA® Fuel Injection Systems. Precision Airmotive offers factory new, rebuilt and overhauled RSA fuel injection servos, flow dividers, nozzles and a complete line of replacement parts and kits. All overhauled components are done so in accordance with the FAA's certified repair station designation awarded to Precision Airmotive.

**CONSOLIDATED™
FUEL SYSTEMS**

Overhauled Fuel Pumps and Systems

Consolidated Fuel Systems™ is an approved FAA Repair Station, authorized to overhaul a complete line of Lear Romec 'RG' style fuel pumps and Continental® fuel injection systems and components. Consolidated Fuel Systems promises a quick turnaround on customer property overhauls.

**Bringing Quality, Innovation and Performance
from the general aviation brands you trust.**

Tempest Aero Group™ is a leading aviation company offering a portfolio of world-class brands, including Tempest®, Alcor®, Stratus Tool Technologies™, Marvel-Schebler®, PrecisionAirmotive® and Consolidated Fuel Systems™.

These independent brands specialize in high-quality ignition, filtration and pneumatic products, instrumentation sensors and probes, oil filter adapters and specialty tools, and fuel systems, components and parts. Tempest Aero Group™ is proud to provide sales, marketing, and other services for these legacy brands and is headquartered in North Carolina.
