New Product Announcement

Fuel Selector Valves for Cessna 182/185

This product expands McFarlane's already extensive Fuel Valve product line!

Proven Design Improvements!

- Anodized for improved corrosion resistance
- Precision machined for longer life
- Improved O-ring retention

Save Thousands \$\$\$

P/N MC0716613 (-1,-2,-3,-4)

Parts interchangeable with original Cessna valve (P/N 0716613 series)

McFarlane has years of experience repairing Cessna valves and has identified problematic areas in original designs. With this knowledge we've incorporated improvements into our design to increase the quality and durability of our fuel valves. All of the improved parts that go into our new valve are interchangeable with the original Cessna valve. This means that if your valve is good with the exception of a few parts, we can fix it at a reasonable price.

Whether you need your valve repaired or need a new valve, McFarlane will save you money!

Repair Kits - Seal Kits - Replacement Parts

- Repair kits contain all required hardware to reseal and repair your valve
- Seal kits conveniently packaged to include all applicable parts
- Complete line of replacement parts
- Take advantage of our overhaul and repair services!
